Learning Moodle on the Go

By and large, Moodle is a straight-forward learning management system; however, even the most canny and intuitive of instructors can run into problems from time to time. Enter Learning Moodle, a free Android app that is “a complete hands-on learning guide for Moodle instructors.” Made by educators for educators, Learning Moodle provides regular updates to its detailed guides. This app will not only allow you to learn the ins and outs of Moodle on your own, but do so while away from your computer.

With an average user review of 4.5/5.0, Learning Moodle is worth checking out. And if you decide to do so, be sure to let the CTRE know what you think of it.

APPEALING APPS & SITES

Site: **thatquiz**
Price: Free!

*thatquiz* provides 38 online, multiple-choice quizzes for students on the following topics: integers; fractions; concepts; geometry; vocabulary; geography; and science. Quizzes are clean and straightforward, and questions tend to lean toward the fundamentals. Instructors can also have quiz scores sent directly to them.

12 Dozen Places to Educate Yourself for Free

Yes, you read that correctly—believe it or not, there are over 140 high-quality self-education websites on the Web that you and your students can use to augment learning at CSU.

Thanks to the writers on the website, Hack Life, you can scroll through a handy list of those websites to find ones that can serve you best. Sites are organized by discipline: science and health; business and money; history and world culture; law; computer science and engineering; mathematics; English and communications; foreign and sign languages; and many more.

The resources found within the websites listed can provide some extra online tutorials, videos, and discussion boards for your students to reinforce what they learn in class. To explore the list, visit: [bit.ly/aMnstP](http://bit.ly/aMnstP)
Faculty Workshop

On Wednesday, October 17, there will be a faculty workshop in the CTRE:

“Working in the Cloud: Video Editing Using Online Tools”

Learn how to use simple online tools to create and edit video content for face-to-face and online students. Participants will learn about several online tools that allow instructors to transform raw video into engaging presentations. This workshop will provide hands-on experience with these tools and practical production advice.

The workshop leader is Jay Sternickle. Mr. Sternickle is an instructor at Joliet Junior College’s Community Education Department and teaches a variety of subjects including digital photography, writing for the internet, graphic design, and web development. He also serves as a web development consultant for the Illinois Small Business Development Center located at the college.

This workshop will take place on Wednesday, October 17 from 12:00 to 2:00 p.m. in LIB 301. To register, please contact James Kowalski at jkowalsk@csu.edu or x2498.

EDUCAUSE Annual Conference

On November 6-9, EDUCAUSE will be holding its annual conference in Denver, CO. The “foremost community of IT leaders and professionals committed to advancing higher education,” EDUCAUSE attracts some of the field’s most innovative thinkers for its annual conferences.

Unlike most conferences, this one will not only be open to both face-to-face and online attendees, but have unique programming schedules for each track (some events will still be shared). This will allow online attendees to participate more fully with other online attendees.

Among the noted speakers at the conference will be writer, consultant, and teacher Clay Shirky; University of Richmond president Edward Ayers; MASIE Center CEO Elliott Masie; and Student Experience Lab Director Christine Flanagan.

To register for the conference, visit: www.educause.edu/annual-conference

Early bird registration rates for online attendees will be valid through November 1.
