- Unprotected Natural Area Sites
- Illinois Natural Area Inventory Sites
- Chicago Park District Regional Parks
- Nature Education Centers (See 2 Below)
- Border Encircling 5 Miles Outside of City Limits
- Potential Acquisition Sites

1. The Forest Preserve Opportunity Map targets potential areas to expand or improve. It is intended to identify new green places, parks, and natural areas for the future. The map illustrates the potential for developing new or improved green spaces in the area. The map is a tool for planning and development, and it is intended to be used in conjunction with other planning tools and resources. The map is intended to be a living document, and it is expected to evolve over time as new opportunities arise.

2. In Chicago's north, the Forest Preserve District will continue to work with the City of Chicago and the Chicago Park District to develop plans and strategies to improve the quality of life for residents. The Forest Preserve District will continue to focus on expanding its network of nature education and recreational programs, as well as improving existing facilities. The map is intended to be a tool for planning and development, and it is expected to evolve over time as new opportunities arise.

3. This map is intended to illustrate the potential for new green places, parks, and natural areas for the future.
