PREPARE FOR THE FUTURE
MIS = BUSINESS + TECHNOLOGY

The College of Business offers a Bachelor of Science degree in Business Administration, with a concentration in Management Information Systems (MIS) and a minor in Cyber Security and Information Technology. This is one of the newest and most rapidly growing fields of business. Students study both business and information technology and learn how to solve business problems using IT tools such as internet technology, system analysis and design, database technology, computer networking, web development, programming languages, etc. Students learn to use and integrate IT and organizational processes to meet the needs of businesses and other enterprises. Opportunities are available in almost all industries and firms.
